Contents

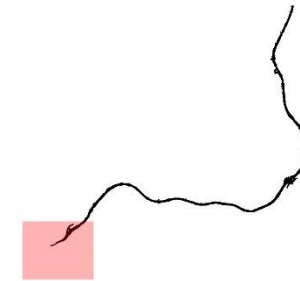

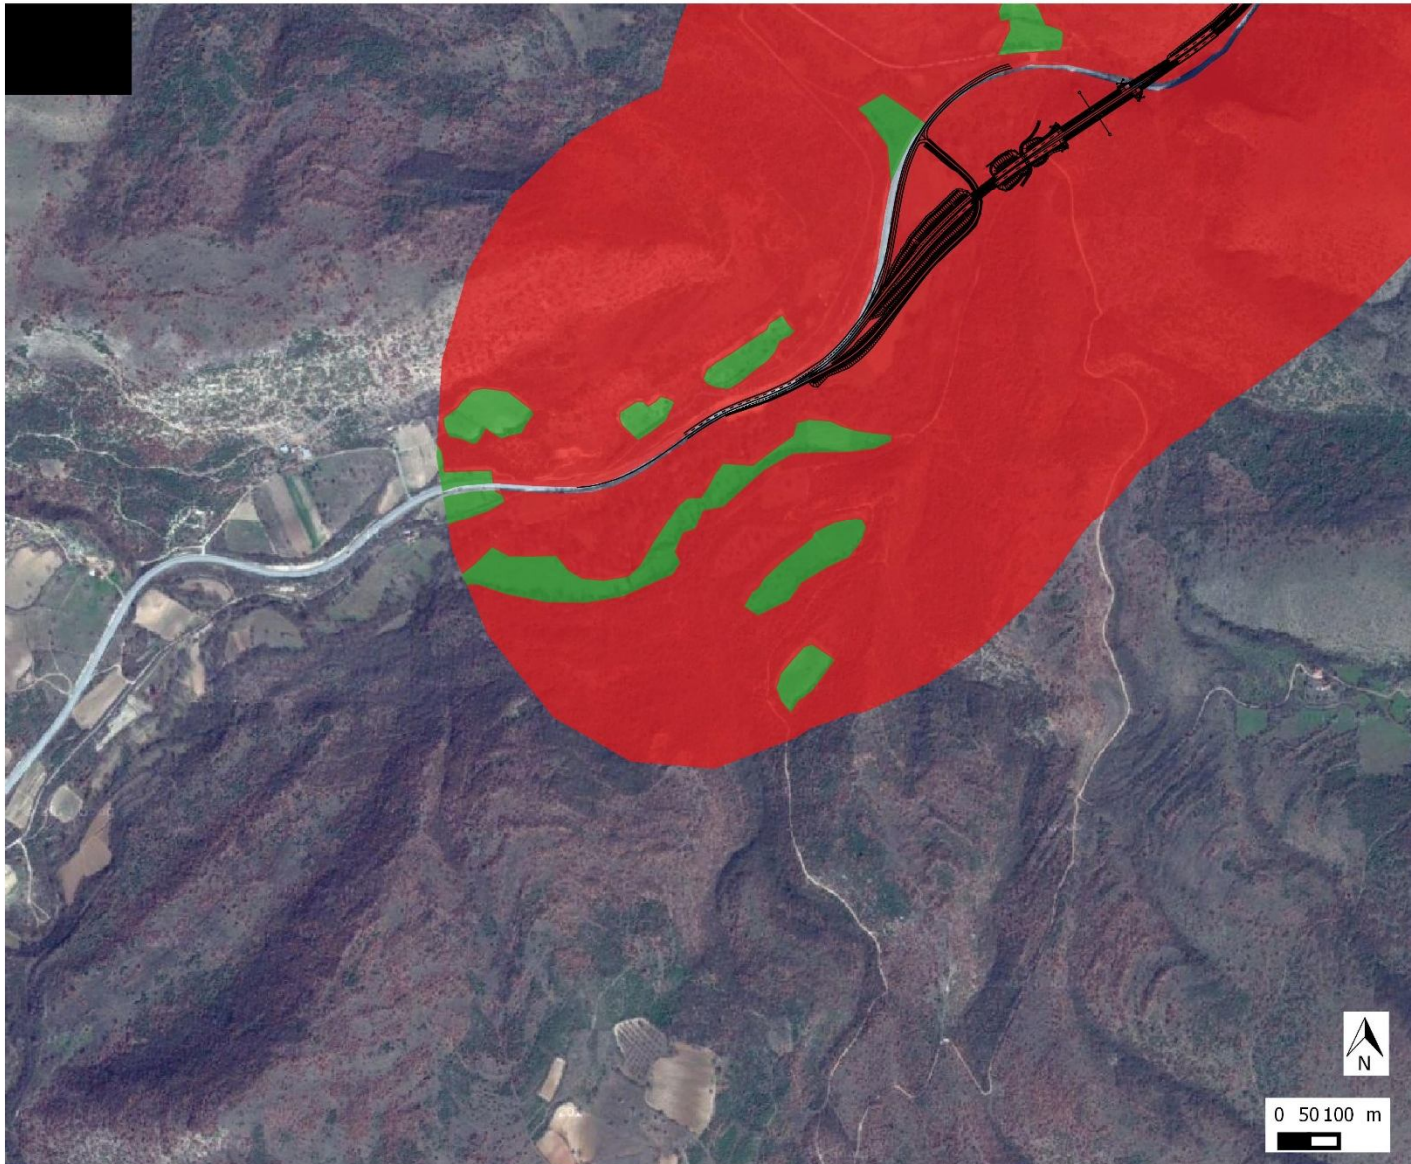

I.	Preferred areas for access roads and related facilities (MIT01)	1
II.	Dust-sensitive habitats - Drenovo Gorge (MIT04)	10

I. Preferred areas for access roads and related facilities (MIT01)

In line with MIT01 measure, maps below locate:

- Natural and critical habitats to avoid for works, access roads and related facilities, vehicles and staff wandering;
- Artificial habitats preferred to install works, access roads and related facilities, vehicles and staff wandering.

River Raec - Drenovo Interchange Road Project, Republic of Macedonia
Biodiversity Management Plan
Constraints map - Footprint minimization on natural habitats

- Strictly minimize works, access roads and related facilities, vehicles and staff wandering
- Preferred areas for works, access roads and related facilities, vehicles and staff wandering
- Road project

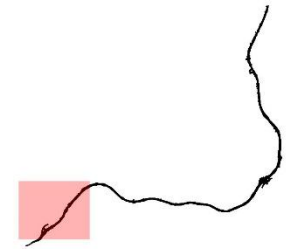

0 50 100 m

Cartography : Biotopo, 2015

- Preferred areas for works, access roads and related facilities, vehicles and staff wandering
- Road project

II. Dust-sensitive habitats - Drenovo Gorge (MIT04)

In line with MIT04 measure, maps below locate natural habitats in Drenovo which are sensitive to dust production.

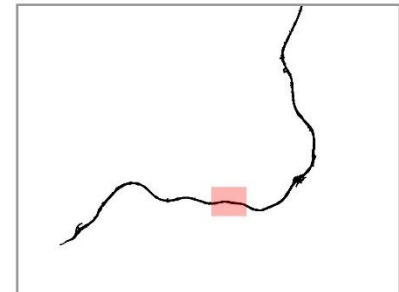

River Raec - Drenovo Interchange Road Project, Republic of Macedonia
Biodiversity Management Plan
Constraints map - Footprint minimization on critical habitats

■ Habitat especially sensitive to dust production
— Road Project

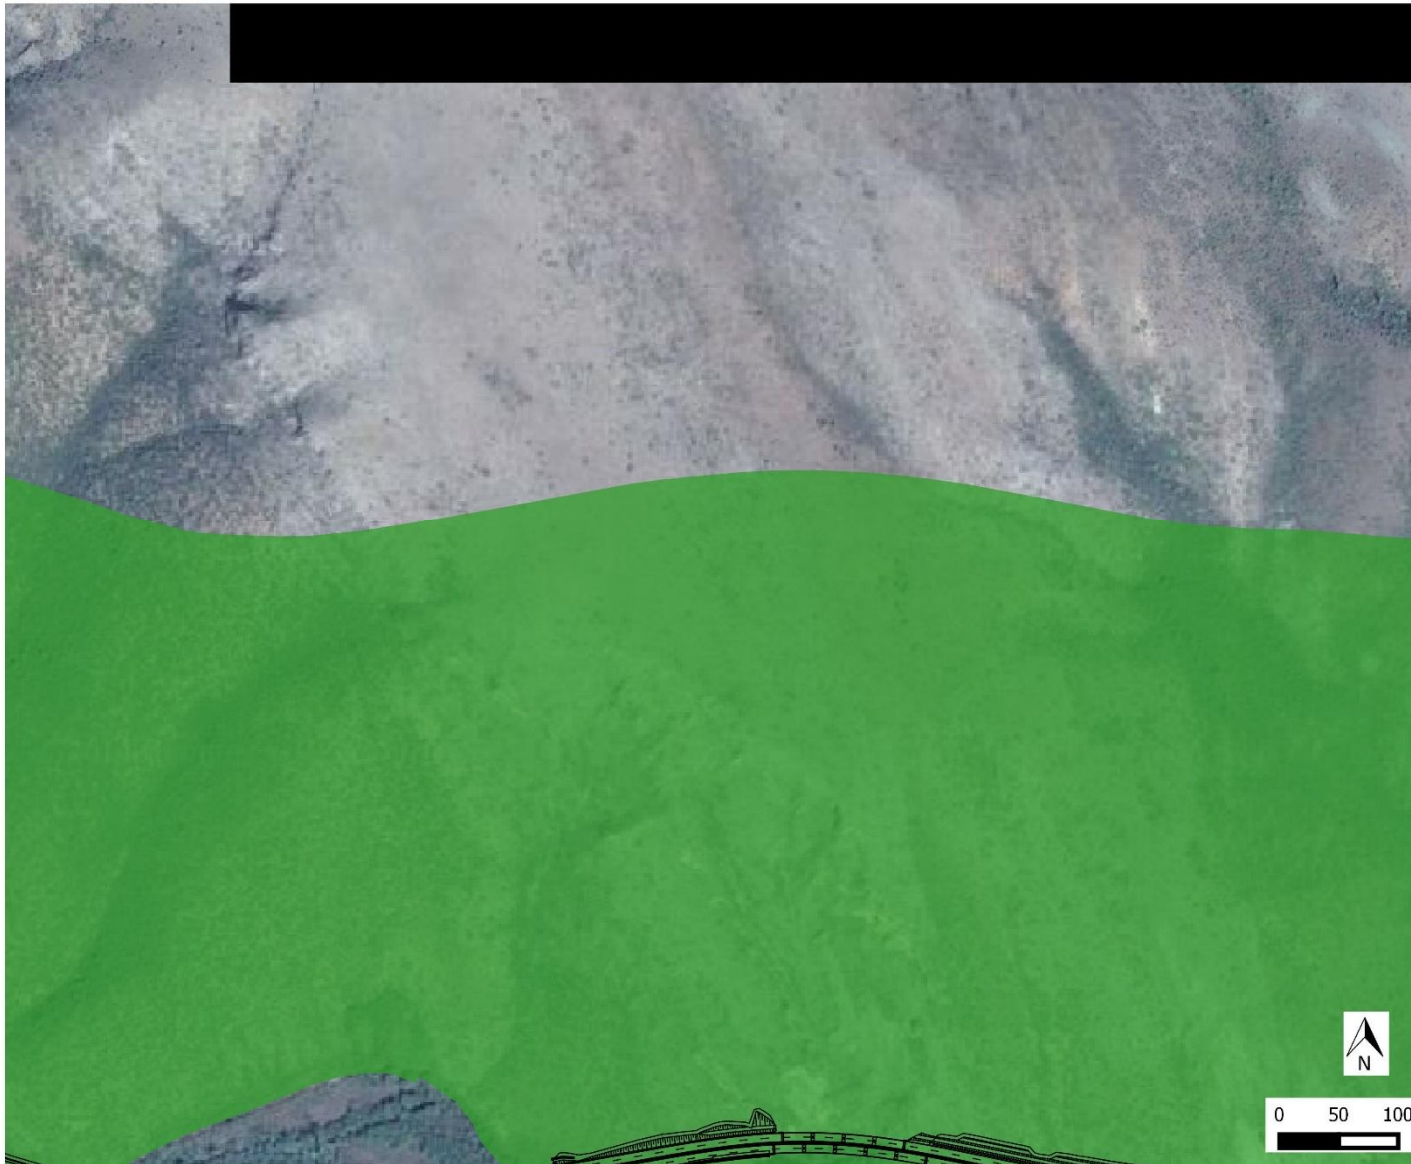

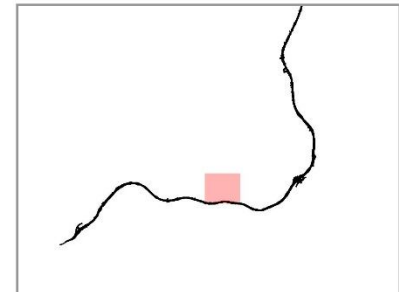

River Raec - Drenovo Interchange Road Project, Republic of Macedonia
Biodiversity Management Plan
Constraints map - Footprint minimization on critical habitats

■ Habitat especially sensitive to dust production
— Road Project
